Murshidabad   Nimgarm Beluri H.S School

ACTIVITIES

- I am proud to have completed all levels of HACKTOBERFEST 2022, making numerous open-source contributions and connecting with developers worldwide. I received an official certificate, which symbolizes my commitment to technology and passion for innovation.
- In college, I won a Rubik's Cube competition organized by Code Vision BCET, demonstrating my skill in puzzle-solving and ability to perform under pressure.
- I am a member of the Codevision club and a part of the technical team in Cybercell, showcasing my passion and expertise in technology and cybersecurity.

WORK EXPERIENCE

01/04/2023 – 01/05/2023

TXON

(Internship)
In this Internship I have work on 4 different Project :

- Developed a basic landing page for Food Order using HTML & CSS.
- Build a calculator for performing basic calculations using HTML, CSS, and JS.
- Build a to-do list where users can list their tasks using HTML, CSS, and JS.
- Create my portfolio website using HTML, CSS, and JS.

During my web development internship, I gained experience working on various projects and improved my technical and soft skills through hands-on guidance. This equipped me with the knowledge to excel in web development and a better understanding of industry practices and company culture.

MY PROJECTS

❖ Weather Report Gui
Project code- https://github.com/Amit5620/Weather-Report
"Designed and developed a user-friendly weather application that provides real-time weather updates and forecasts."

❖ Landing Page Food website
Project code- https://github.com/Amit5620/TXON_task/tree/main/Task_no_1
"Designed and developed an online food ordering website with a user-friendly interface."

❖ Calculator
Project code- https://github.com/Amit5620/TXON_task/tree/main/Task_no_2
"Created a functional calculator using HTML, CSS, and JavaScript."

❖ College Survey Form
Project code- https://github.com/Amit5620/Survey-Form
"Designed and developed a user-friendly survey form for collecting feedback and data from college students."

❖ Restaurant Food Menu Card
Project code- https://github.com/Amit5620/Menu-card
"Designed and developed an appealing and interactive digital menu card for a restaurant showcasing their food items and prices."
